### DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### *Claim Rejections - 35 USC § 103*

Claims 45-64 are rejected under 35 U.S.C. 103(a) as being unpatentable over the brochure in view of Rohrback of record for reasons of record and further in view of Elliott, Jr., U.S., Patent 4,437,968.

The combination of Rohrback and the brochure fail to disclose the use of a timer and the measurement as claimed.

The Elliott patent is cited which shows that one having ordinary skill in the art would by observation or by the automatic means, such as a timer control the cleaning (see col. 11, lines 39-60).

Consequently, the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the brochure and Rohrback with the teachings of Elliott, because the Rohrback observes the buildup of scale by a measurement of an electrical property and the Elliott patent teaches the use of observation and/or automatic scraper to clean the surface from scale.

Claims 52 and 64 are rejected under 35 U.S.C. 103(a) as being unpatentable over the brochure in view of Rohrback and Elliott as applied to claims above, and further in view of Huba of record for reasons of record, wherein Huba teaches the use of constant current (see col 13, example 1).
